1.3 Use of Artificial Intelligence (AI)

AI tools may be used to assist with research or to refine or improve responses. However, applicants should avoid reliance on AI or excessive use.

Generic, repetitive or unsubstantiated claims undermine project proposal credibility and will generally result in a lower assessment score. AI may also make incorrect assumptions that create inconsistencies throughout applications, so all content should only be submitted after thorough review and validation by the applicant.

1.4 Assessment Process

The assessment criteria outlined in the Guidelines will be used to determine the suitability of submitted applications.

Applications will be assessed on a competitive basis and should demonstrate:

- Alignment with RED Grants Program objectives;
- Alignment with Wheatbelt regional priorities;
- Financial co-contribution and project readiness;
- Regional collaboration and Local Content.

As part of the assessment process, applications may be subject to a due diligence process to determine organisational capacity, governance and financial management. Applicants should note that the assessment and decision making process could take up to six (6) months to complete and this timeframe should be considered when planning your project. Please refer to the Guidelines for more information.

If your application is successful, you will be required to enter into a Grant Agreement with the State Government, outlining the grant's terms and conditions. All projects must receive approval and have a signed Grant Agreement in place before the project can commence. Grant funding will not cover retrospective costs. Any expenses incurred before the Grant Agreement is executed will not count towards eligible project expenditure. As a condition of receiving the grant, all recipients must submit a detailed Final Report (Acquittal) within 12 weeks of project completion.
